TECHNICAL BULLETIN -18-003-EN**NEW PACKAGING FOR BIANCA PL162T MACHINE**

Dear Sirs,

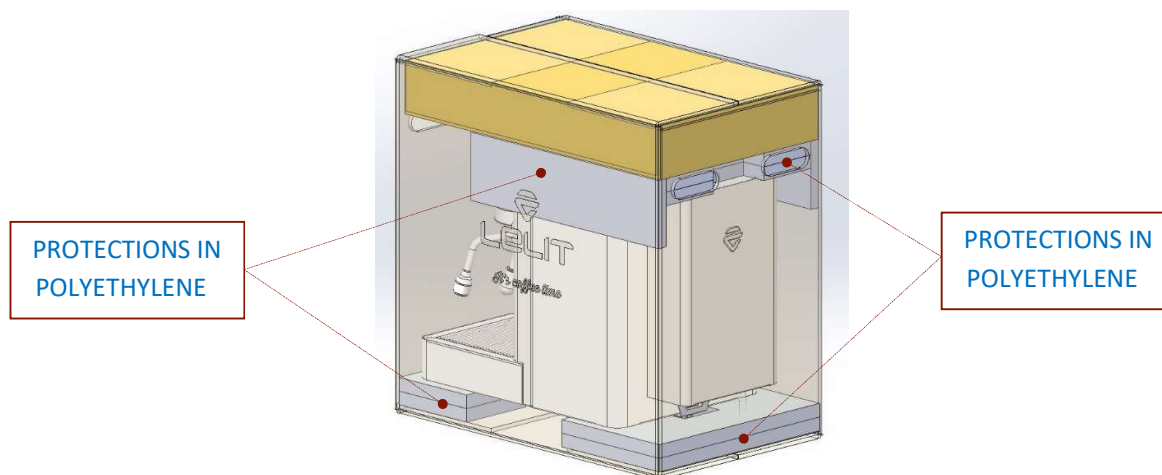

Please note that starting from machine serial number 182055 we have implemented a new packaging for Bianca PL162T machine.

The new packaging has been improved in order to restrict the machine movement inside the box and increase the protection against possible falls and impacts during transport.

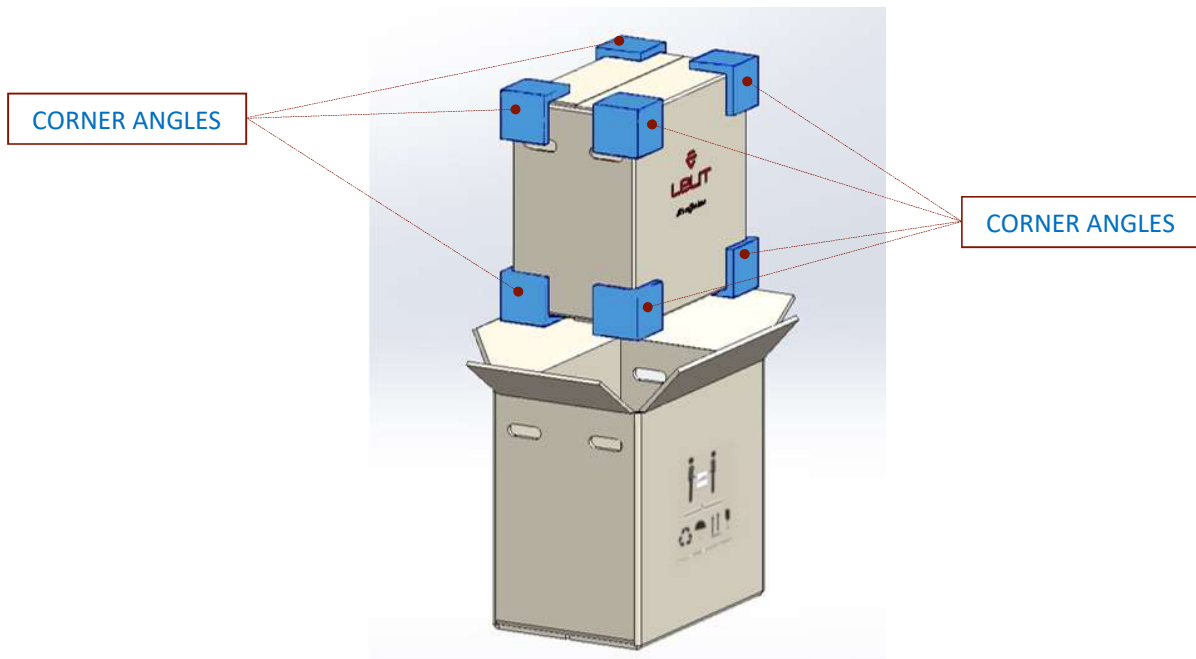

- 1- To make the handling and the transport easier, the pallet has been eliminated, a triple wall extra box with side handles has been added.

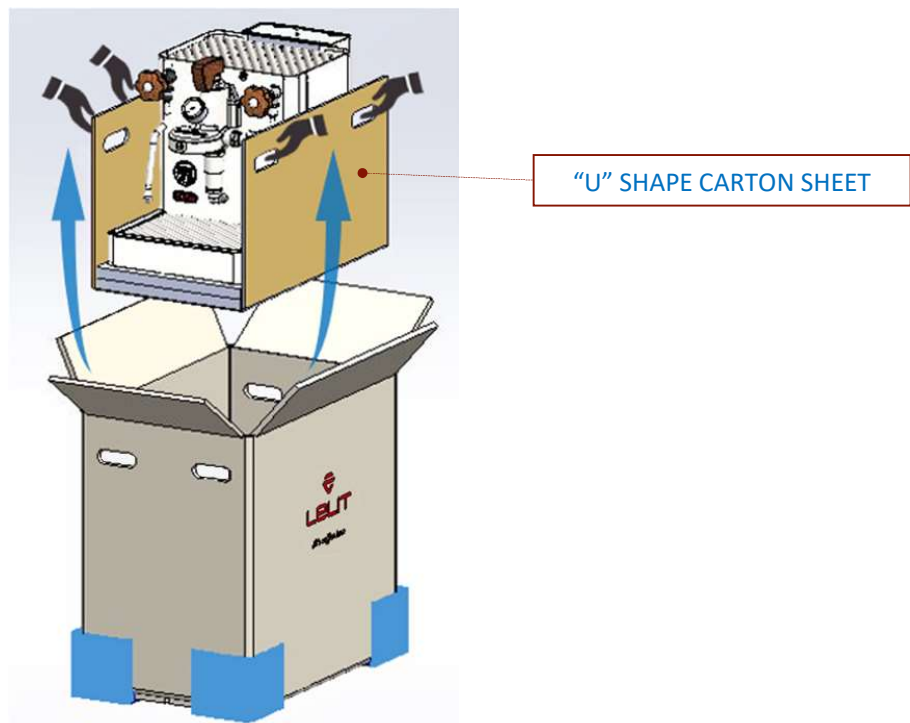

- 2- The internal protections, which previously were in Polystyrene, are now made of Polyethylene, a water proof material with higher shock absorption and a better elasticity, therefore particularly suitable to protect the machine against any possible impact.

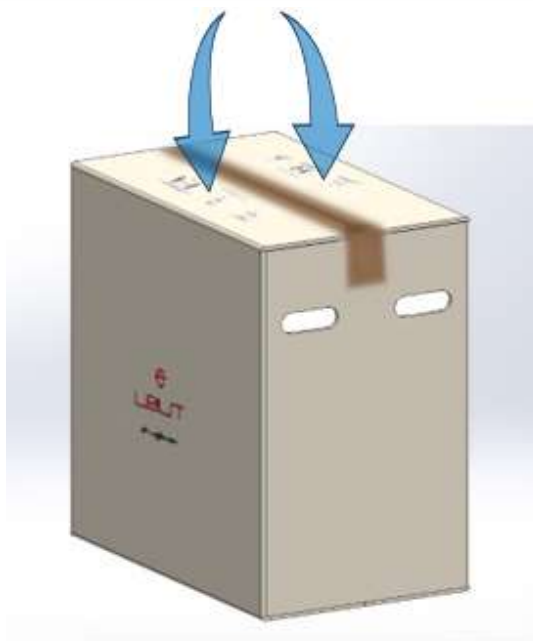

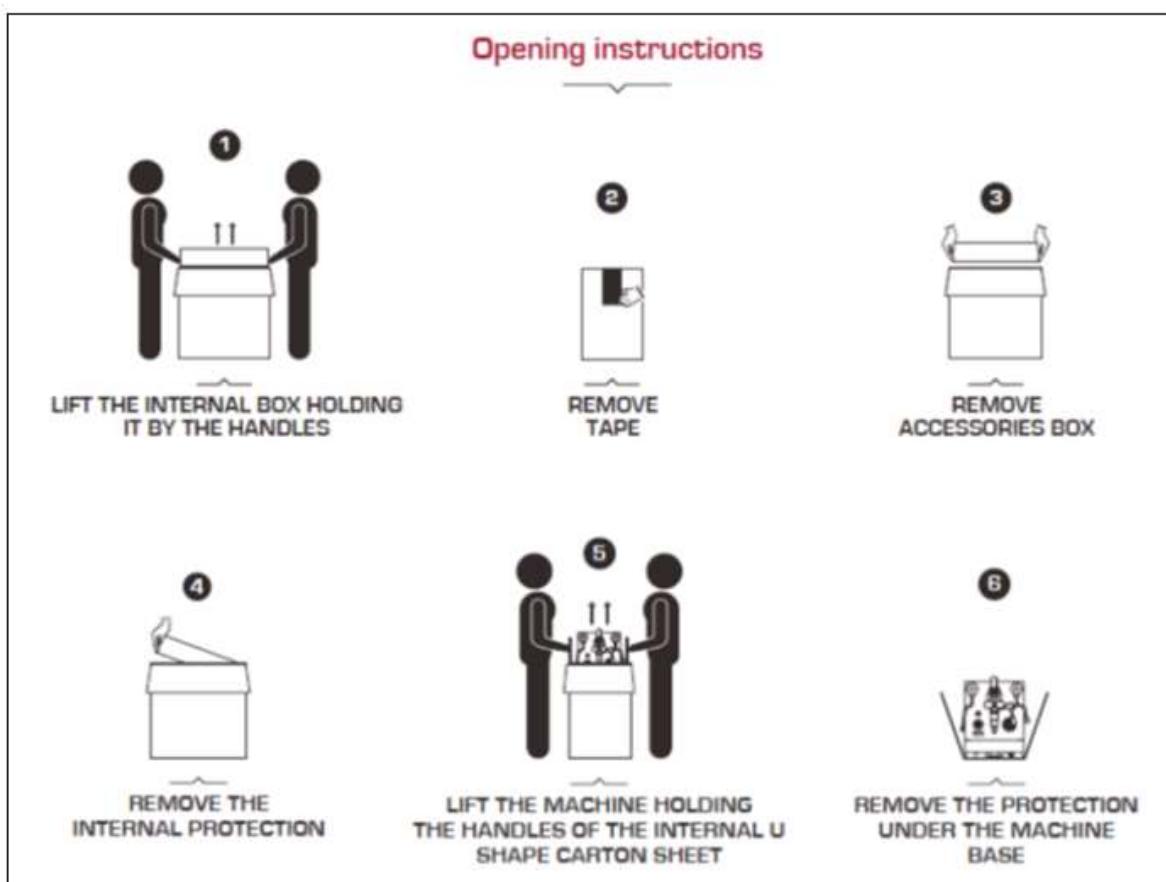

3- 8 corner angles in polyethylene have been inserted to space out the inner box from the overpack.

4- An internal "U" shape carton sheet with handles has been designed to lift the machine and remove it from the box easily.

- 5- On the upper side of the box containing the machine, you will find the instructions showing how to remove the machine in the correct way.

Please feel free to contact us for any further information you may require.

Best regards

Customer care Dept.
